STAGECRAFT

STAGE DIMENSIONS

Stage width: 30 ft. - 26-28' useable

Downstage edge to the upstage wall: 12 ft.

FOH to downstage center: 70 ft. No proper back stage or wings.

This is an old historic movie theatre converted into a live music and events venue.

The stage diagram may look a bit strange, since it involves a flat, overhead view of the actual stage (and a 3-D boxed version of an upper, alcove that is 4 1/2 feet above the upstage portion of the stage).

There is no house drum riser.

VIDEO

18'x12' Video screen drops at upstage edge

6500 Lumen projector at FOH accepts VGA, RCA & Component Video inputs

PARKING

There is a parking lot to the right side of the building that will accommodate buses and buses with trailers. See the diagram. Just pull straight in with the trailer facing Madison Road. You will load in any gear that needs to be pushed thru the doors nearest Madison Road. You can go to the office door (on Madison) and knock to gain entrance to the theatre.

BACKSTAGE, DRESSING ROOMS, ETC.

There is no backstage (behind or near the stage) but there is a dividable green room area on the second floor, above the venue office and inner lobby. There are 2 private bathrooms upstairs (but no shower). Wireless internet flows freely throughout the venue. Connect to the NANA NETWORK... Password = BEF3462BCD
